DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-31 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 3-27, and 29-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Whigham (6,584,309).

Regarding claims 1, 3-27, and 29-31, Whigham discloses a vending machine purchase via cellular telephone comprising the steps of: providing a token to an access control administrator (see abstract, fig.1, elements 120, 126, "identity of the product 104" and its description); providing a token to said user using a first communication channel (see abstract, fig.1, elements 102, 104, 114, 118, fig.2, step 203, col.5, lines 55-60, "identity of the product 104" and its description); instructing said user to enter said provided token using a cellular telephone that has been previously associated with said user (see abstract, fig.1, elements 102, 114, fig.2, step 204, col.5, line 60-col.6, line 6, and its description); and providing access to said user if said entered token matches

Art Unit: 2688

said provided token and is received from a cellular telephone having a serial number previously associated with said user (see abstract, fig.1, fig.2, steps 206-216, col.6, lines 4-col.7, line 48 and its description).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2, and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Whigham (6,584,309).

Regarding claim 2, 28, Whigham discloses all the subject matters described in rejected claims 1, and 27, except for receiving a password from said user. However, provide password before using the service is well known in telecommunication system, in order to provide the security of purchasing through the wireless networks.
